

Nautical Cloud Version 4.9.0 May (v2) 2023 Release Notes

Communications

Ability to send a communication to entries of a division or a class only (Text and Email)

Tracking

The ability to export the templated YB Tracker sheet.

Export a sheet of boats and YB Tracker Serial numbers, update the sheet and reimport the serial numbers.

Other Enhancements

Option to display Line Honours winners in results for Multihull and Monohull

A new report on the race dashboard that shows all entries with outstanding tasks and what those tasks are.

Bug Fix for STIX values not saving without removing the decimals.

The boat mobile field on the race entry now makes it clearer that this mobile needs to be onboard during the race.
