

Nautical Cloud Version 4.9.2 June (v2) 2023 Release Notes

Outstanding balance alert

When an account is set to allow pay later or takes a deposit, a new field in race details called Final Payment due on must be set.

When competitors have a card registered against their account, they will only see the payment due alert if the Final Payment date and time has passed.

World Sailor Details

A nightly process now runs to keep all World sailor status and categories updated.

Virus Scanning

All documents uploaded in the race office are now passed through an online virus scan. Note all competitor uploaded documents have always been scanned.

Race Records

Against a race, records can be set by monohull, multihull and by each rating authority.

If a record is setup, it will show on the results and live results and any boats beating records will be displayed with a banner next to their finish time.

Crew Waiver Settings

In your setup, you can now control what your crew waiver is called and the summary terms text each registered user presses to agree to them.

Protest Boards

Each protest now shows on the notice of race page for that race.

Online accounts – Custom Fields

New support for field types of Whole number.

Finish Times in the race office

Enhancement to the grid size and validation have been made.

Report Subscriptions

Race Offices can now subscribe to daily email reports. These currently include any race office task and new race entries from the previous day.

Transit Points and Sector Time

A new analysis page shows time in sector and detailed transit point information when using transit points in a race. (YB Tracker or manually enter)

In the race office when you add go to add transit points you can turn on the new transit point analysis button in the results.
